DAY-8

BLOCK-1 : Aptitude

1.) The average of 5 numbers is 20. Find the total sum.

Solu:-

Sum = Avg × Num.

= 20 × 5

= 100 //

2.) The average of 10 numbers is 15. If one number is removed, the average becomes 14. Find the removed number.

Sum = Avg × Num.

Solu:- Total Sum = 10 × 15 = 150.

9 Numbers = 9 × 14 = 126

Removed Number = 150 − 126

= 24. //

3.) A container has milk and water in ratio 3:2. If 10 Liters of water is added, ratio becomes 3:4. Find initial quantity.

Solu. Milk : Water

3x : 2x

water - 10 Liter added.

2x + 10

$$\frac{3x}{2x+10} = \frac{3}{4}.$$

Scanned with OKEN Scanner

$3x \times 4 = (2x + 10) \times 3$

$12x = 6x + 30$

$12x - 6x = 30$

$6x = 30 \Rightarrow x = \frac{30}{6}$

$\boxed{x = 5}$

Water ratio: $5x = 5 \times 5 = 25$

$= 25$ Liters.

4.) Find average of first 20 natural numbers.

Solu:

$$\text{Avg} = \frac{(\text{First} + \text{Last})}{2}$$

$$\text{Avg} = \frac{1 + 20}{2} = \frac{21}{2}$$

$$\text{Avg} = 10.5$$

5.) The average age of 5 students is 1

A new student joins and average becomes 19. Find age of new stude

Solu:- Sum $= 5 \times 18 = 90$

Student $= 5$.

New Student $= 6 \times 19 = 114$

Age $= 114 - 90$

$= 24$ //

BLOCK-2 : Verbal Ability

Reading Passage :-

1.) Why are data structures important?

It help to organize and store the data efficiently.

2.) Name some operations performed on data.

* Searching
* Inserting
* Deleting

3.) How does choosing the right data structure help performance?

It makes operations faster and improves performance.

Grammar Corrections:

1.) He don't understand data structures

He doesn't understand data structures.

2.) She have completed the assignment.

She has completed the assignment

3.) They was working on the project.

They were working on the project.

BLOCK-3 = Communication Practice

Explain your favorite programming Language.

My favorite programming Language is python. I like python because it is very easy to Learn and simple to use. The syntax is clear and easy to understand. Python is used in many areas like web development, data science, AI and Automation. Some features of python are simple syntax, readability, and powerful Libraries. I have used python for small programs and learning basic coding concepts. It is beginner-friendly and very useful.
