Day-1

Block-1: Aptitude (Percentages):-

1.) A number increased by 20% becomes 120. Find the original number.

Solu:

Num increased = 120 => F

Percentage = 20% => P

Formula => $\frac{F}{1+\frac{P}{100}}$

$\Rightarrow \frac{120}{1+\frac{20}{100}} \Rightarrow \frac{120}{\frac{12}{10}} \Rightarrow \frac{120\times10}{12}$

$\Rightarrow \frac{1200}{12} = 100.$

Original Number = 100

2.) If the price of a Laptop increases from ₹ 50,000 to ₹ 60,000, what is the percentage increase?

Solu:

Initial prize = ₹ 50,000

Increased Prize = ₹ 60000

100% = ₹50,000

x % = ₹60,000

$\frac{100}{x} = \frac{50000}{60000} \Rightarrow \frac{100}{x} = \frac{5}{6}$

Scanned with OKEN Scanner

$600 = 5x$

$\frac{\overset{120}{\cancel{600}}}{\cancel{5}} = x$

$\boxed{x = 120}$

increased Percentage $= x - 100$

$= 120 - 100$

$= 20\%$

20% increased.

3.) A student scored 72 out of 90 in an exam. Find the percentage ~~increase~~ Score.

Soln:-

72 out of 90 Mark.

$100\% = 90$

$x\% = 72$

$\frac{100}{x} = \frac{\overset{\cancel{30}}{\cancel{90}}}{\underset{\cancel{24}}{\cancel{72}}}$ $\cancel{10}$ 5 $\cancel{8}$ 4

$400 = 5x$

$\frac{\overset{80}{\cancel{400}}}{\cancel{5}} = x$

$x = 80$

Percentage is 80%

4.) The population of a town increases from 50000 to 60,000. Find the percentage increase.

Solu:

Initial population = 50000 => 100%

Increased population = 60000 => x%

$$\frac{100}{x} = \frac{\cancel{50000}}{\cancel{60000}}$$

$$\cancel{600}^{120} = \cancel{5}x$$

$$\boxed{x = 120}$$

Diff = $x - 100 = 120 - 100$

Diff = 20%

20% population increased //

5.) A shirt originally costs ₹800. After a 25% discount, what is the final price?

Solu:

100% = 800

25% = x

$$\frac{\cancel{100}^{4}}{\cancel{25}_{1}} = \frac{800}{x}$$

$$4x = \cancel{8}^{2}00$$

$$x = \frac{800}{4} \Rightarrow 200$$

Discount = ₹200.

Final Price = 800 - 200 = ₹600 //

Block-2: Verbal Ability:-

Reading Passage:

1.) what is the main idea of the passage?

⇒ Technology is the main idea of the passage.

2.) which technologies are mentioned in the passage?

* Artifical Intelligence.
* Machine Learning.
* Automation.

3.) Why are companies relying on data-driven decisions?

→ They enable more accurate, efficient, and informed choices, etc...

Grammar correction:

1.) She don't understand the problem.

⇒ She doesn't understand the problem.

2) He have completed the task.

=> He has completed the task.

3) They was going to the meeting.

=> They were going to the meeting.

Block - 3: Communication Practice

Self-Introduction:

I am Balraj Balasubramaniyan from Kallakurichi. I am currently pursuing B.E Degree with CSE (Cyber Security) at Muthayammal Engineering College. I completed my school in Kanchanadevi Matric. Hr. Sec School at Alathur. I have pratical experience in MERN stack Development. I am interested in software development and problem solving.

Scanned with OKEN Scanner

I have worked on projects like: Automatic timetable generator and Placement insight Dashboard.

I have completed virtual internship is ServiceNow platform for 1 month.

and I have certified in Distributed system - NPTEL.

My Goal is to build a successful career in IT industry and continuously improve my upcoming skills.
