DAY-3

Block-1: Aptitude (Ratio & Proportion):-

1.) If the ratio of A : B is 3 : 5 and B : C is 2 : 3, find A : C.

Soln:

$$\frac{A}{B} = \frac{3}{5}, \quad \frac{B}{C} = \frac{2}{3}$$

$$\frac{A}{\cancel{B}} \times \frac{\cancel{B}}{C} \Rightarrow \frac{A}{C}$$

$$\frac{\cancel{3}}{5} \times \frac{2}{\cancel{3}} \Rightarrow \frac{2}{5}$$

$$\frac{A}{C} = \frac{2}{5}.$$

$$A : C = 2 : 5.$$

2.) Divide ₹1000 in the ratio 2 : 3 : 5.

Soln: Total ratio = 2+3+5 = 10.

$$1 \text{ Part} = \frac{1000}{10} = 100$$

$$2 \times 100 : 3 \times 100 : 5 \times 100$$

$$200 : 300 : 500$$

3.) If the 4 pens cost ₹40, what is the cost of 10 pens?

Solu:-

4 pens = ₹40

$= \frac{40}{4}$

1 = 10.

10×10 = 100.

4.) The ratio of boys to girls in a class is 3:2. If total students = 50, find number of girls.

Solu:-

Ratio = 3 : 2 ⇒ 3+2 = 5.
(B : G)

Total student = 50

1 part = $\frac{50}{5}$ = 10.

girls 2 part = 2×10

= 20 girls.

5.) If A : B = 4 : 7 and B = 21, find A.

A : B = 4 : 7 , B = 21.

7 part = 21.

1 part = $\frac{21}{7}$ 3.

4 part ⇒ A ×3 = 12

$\boxed{A = 12}$

Block-2: Verbal Ability.

Reading Passage:

1.) Why are data structures important?

It help organize data efficiently, which leads to better performance when solving problems.

2.) What happens if we choose the wrong data structure?

Choosing the wrong data structure can lead to slower performance, higher memory usage and inefficient code.

3.) What ~~does~~ performance mean in programming.

In programming, performance refers to how fast and efficiently a program runs.

Grammar Corrections:-

1.) He go to college daily.

He goes to college daily.

2.) She don't likes coding.

She doesn't likes coding.

3.) We was solving problems.

We were solving problems.

Block-3 : Communication Practice

My Strengths and Weaknesses:

I am naturally curious and eager to learn new things; with a strong ability to adapt and adjust to changing situations. Meanwhile, I am working on building stronger time. Sometimes struggle with motivation and focus for multiple tasks. Breaking tasks into smaller steps to reduce overwhelm and build momentum. Setting daily priorities so I start with what matters most, not what's easiest.
